PROJECT

E-WASTE COLLECTION AND SELLING :- DIPLOMA FINAL YEAR PROJECT IN CREART SOLUTIONS PVT. LTD.

This web application developed by using HTML, CSS, JAVA SCRIPT, PYTHON, MYSQL.
It is a web application for collecting waste and sell container ,boxs ,etc. Using this application, a user can request for waste collection & also purchase the dispenser to store waste.

MUSICORA (MUSIC-APP)- 14 DAYS INTERNSHIP IN CREART SOLUTIONS PVT. LTD.

Musicora is a web-based music website developed using HTML, CSS, and JavaScript that offers a simple and creative way to explore music. Users can browse albums, playlists, and artists, and easily find music through an integrated search feature. Its responsive design ensures smooth performance across all devices. Musicora is built as a scalable prototype, ready for future enhancements such as music streaming, personalized recommendations, and user accounts.

VIRTUAL ASSISTANT (PYTHON PROJECT):

Developed a Python-based voice-controlled Virtual Assistant using SpeechRecognition and pyttsx3 for hands-free interaction. The assistant can open system applications, perform Google searches, announce the current time, and provide weather updates via AccuWeather. It uses webbrowser and OS libraries for automation tasks and Requests for web handling. This project demonstrates practical implementation of voice recognition and Python automation skills.
